BUDGET IMPACT: \$362,500.00 (reimbursable)

Annual
 Capital
 N/A

FUNDING SOURCE: County Transportation Trust
EXPENDITURE ACCOUNT: 103-340-541-3100

HISTORY/FACTS/ISSUES:

The Public Works Division (PWD) has been in coordination with FDOT regarding funding for a project to widen and resurface CR 542W from US 301 to C-475, approximately 2,000 feet.

FDOT concurs and recommended a SCRAP grant. The Scope of Services is at Exhibit "A", and includes widening the travel lanes to 10 feet with a one foot paved shoulder on each side. The proposed remediation program for the roadway is to reclaim the existing asphalt and base and compact to LBF 40 to create a uniform stabilized sub-grade.

The PWD developed the design for this project using one of our CCNA consultants. Once FDOT approves the design, PWD will develop the final bid documents, obtain the construction NTP from FDOT, and complete this project in accordance with the schedule at Exhibit "D". The construction is estimated to be complete by February 2014, with project and grant completion by February 28, 2014.

Should the total construction cost exceed the grant amount of \$362,500, PWD will provide the additional funds.

PWD recommends approval of this grant and requests the Chairman's signature at 2 locations: page 15, the basic grant, and page 24, the Resolution.
