Add the email and attachments to my reports for the 9/8/20 BOCC meeting for information only. Bradley

Sir,

Attached is the August 2020 State report. I did want to also highlight the work Monica and her team have accomplished. Monica took over as the Animal Services Manager in January 2020 and she and her team have made many significant improvements in the operations. In April we assigned one of our ACO's as a lead to work with the rescues and adoptions. Below is a summary of our monthly live release from April through August. Although July shows us dipping to 88%, that is the month we received 98 chickens from a cruelty/neglect case that were in poor condition upon arrival. During this period we took in approximately 219 animals per month. I have also attached a summary for the last 12 months. During that period we maintained an overall live release rate of 89.67%. However, our live release rate minus owner requested euthanasia is 90.25%.
